

Arjun Iyer

n8n Automation Developer

arjun.iyer.automation@email.com | +91 96543 21098 | Hyderabad, India | github.com/arjuniyer-automation

PROFESSIONAL SUMMARY

Automation developer with 2.5 years of experience designing and maintaining n8n workflows that connect CRMs, marketing tools, and internal systems. Skilled at replacing manual, repetitive processes with reliable, monitored automations and custom API integrations.

SKILLS

Automation: n8n (self-hosted & cloud), Zapier, Make (Integromat)

Programming: JavaScript/Node.js, Python, REST & GraphQL APIs, Webhooks

Integrations: HubSpot, Salesforce, Slack, Google Workspace, Airtable, Notion, Stripe, WhatsApp Business API

Infra: Docker, basic Linux server administration, PostgreSQL, Redis, queue-based workflow scaling

Other: Git, Postman, error-handling & workflow monitoring/alerting

PROFESSIONAL EXPERIENCE

Automation Developer | FlowBridge Consulting

Mar 2024 – Present

- Designed and deployed 50+ production n8n workflows automating lead routing, invoicing, and support-ticket triage for 10+ client accounts.
- Built a self-hosted n8n instance on Docker with queue mode, improving reliability for high-volume webhook workflows (~40,000 executions/month).
- Created reusable custom n8n nodes for a proprietary internal API, cutting new-workflow build time by 30%.
- Set up centralized error-alerting (Slack + email) across all client workflows, reducing undetected failures to near zero.

Junior Automation Engineer | Vertex Business Systems

Mar 2023 – Feb 2024

- Migrated 20+ manual spreadsheet-based processes into n8n workflows integrated with Airtable and Google Sheets, saving an estimated 25 team-hours per week.
- Built a HubSpot-to-Slack lead notification workflow with custom filtering logic, cutting lead response time from hours to minutes.
- Supported clients in scoping automation requirements and translating them into workflow diagrams before build.

SELECTED PROJECTS

- Order-to-Invoice Pipeline — End-to-end n8n workflow connecting Shopify, Stripe, and an accounting tool, fully removing manual invoice creation.
- Support Ticket Triage Bot — n8n + OpenAI node workflow that classifies and routes incoming support emails, reducing first-response time by 45%.

EDUCATION

B.E. in Information Technology — Osmania University, Hyderabad (2019 – 2023)

CERTIFICATIONS

- n8n Certified Workflow Automation Specialist
